Places in the Cloud With the Universal Cloud Network, the WAN is no longer a separate or multiple entities. It is a unified extension of the Data Center/LAN, leveraging the same management and monitoring, vastly simplifying IT operations and allowing NetOps teams to orchestrate and automate WAN and LAN functions synchronously.

Any Cloud - Hybrid Cloud Networking - Arista

The Arista CloudEOS platform runs as an EC2 instance in each Amazon Virtual Private Cloud (VPC), supporting the high-performance interconnection of VPCs through a spine-leaf topology that leverages transit VPCs as aggregators and secure gateways to connect VPCs to the enterprise. The solution provides seamless integration with AWS native APIs.
