AQA A Level Chemistry Specification . The AQA A Level Chemistry specification is demanding and contains aspects of organic and inorganic chemistry and well quantitative chemistry, so it is essential your maths skills are strong. AQA A Level subject content. 3.1 Physical chemistry. 3.1.1 Atomic structure. 3.1.2 Amount of substance. 3.1.3 Bonding

Each topic is treated from the beginning, without assuming prior knowledge. Each chapter starts with an opening section covering an application. These help students to understand the relevance of the topic: they are motivational and they make the text more accessible to the majority of students. Concept Maps have been added, which together with Summaries throughout, aid understanding of main ideas and connections between topics. Margin points highlight key points, making the text more accessible for learning and revision. Checkpoints in each chapter test students' understanding and support their private study. A selection of questions are included at the end of each chapter, many form past examination papers. Suggested answers are provided in the Answers Key.

Suitable for all examination specifications for students over 16, this friendly and reliable guide leads students through examples of each problem.

Fully revised and updated content matching new Cambridge International Examinations 9701 syllabus for first examination in 2016. Endorsed by Cambridge International Examinations, this digital edition comprehensively covers all the knowledge and skills students need during the A Level Chemistry course (9701), for first examination in 2016, in a reflowable format, adapting to any screen size or device. Written by renowned experts in Chemistry teaching, the text is written in an accessible style with international learners in mind. Self-assessment questions allow learners to track their progress, and exam-style questions help learners to prepare thoroughly for their examinations. Answers to all the questions from within the Coursebook are provided.

Chemistry: AS Level and A Level clearly separates AS and A Level material, making this book suitable for both courses. Activities such as chapter learning objectives, questions through the text and end-of-chapter exercises encourage independent learning. The material is suitable for all students, including those for whom English is a second language.

A revision guide tailored to the AS and A Level Chemistry syllabus (9701) for first examination in 2016.

Covering the core requirements of the OCR A, Edexcel and AQA specifications, AS and A Level Chemistry is clearly structured into two parts to ensure students progress confidently through the course.

Endorsed by Cambridge Assessment International Education for full syllabus coverage Foster a deeper understanding of theoretical concepts through clear guidance and opportunities for self-assessment throughout; covers the entire Cambridge International AS & A Level Chemistry syllabus (9701). - Navigate the different routes through the course with ease with clearly divided sections for AS and A Level. - Focus learning with learning outcomes clearly defined at the beginning of each section - Test knowledge and understanding with past paper and exam-style questions - Address the Key Concepts in the syllabus, which are clearly highlighted throughout the course The Revision and Practice CD included with every Student's Book provides interactive tests, summaries of each topic and advice on examination techniques.

In this third edition of a textbook for A-Level chemistry, each topic starts at a level accessible to students who have attained Level 7/8 of the National Curriculum in Science, and is treated from the beginning without assuming that work from a previous course has been remembered.
