cheminformatics) focuses on storing, indexing, searching, retrieving, and applying information about chemical compounds.

Cheminformatics involves organization of chemical data in a logical form to facilitate the retrieval of chemical properties, structures and their relationships.

~~Applications of Bioinformatics in Medicine and Biotechnology~~

Bioinformatics is a combination of biology and computer science while biotechnology is a broad scientific discipline where biological sciences combined

such as pharmacogenomics, gene expression, recombinant proteins from methylophilic yeast, novel fermentation inhibitors of bioethanol production

~~Apple Academic Press~~

Biotechnology is the field of study that involves the practical use of biological processes in industrial production. The early applications of biotechnology gave rise to the making of beer, wine, and cheese. With advances in technology, vaccine development and insulin production were made possible through biotechnology.

Advances in Proteomics and
Bioinformatics is a
scientific, online peer-
reviewed journal which
covers high quality
manuscripts which are both
relevant and applicable to
the broad field of knowledge
related to proteomics &
bioinformatics in animal,
plant and microbial world.
The objective of the journal
is to maintain and develop
science and related research
at an international level.
