The clock plays a significant part in our understanding of temporality, but while it simplifies, regulates and coordinates, it fails to reflect and communicate the more experiential dimensions of time. As Helen Powell demonstrates in this book, cinema has been addressing this issue since its inception. *Stop the Clocks!* examines filmmakers' relationship to time and its visual manipulation and representation from the birth of the medium to the digital present. It engages both with experimentation in narrative construction and with films that take time as their subject matter, such as *Donnie Darko*, *Interview with a Vampire*, *Lost Highway* and *Pulp Fiction*. Helen Powell asks what underpins the enduring appeal of the science fiction genre with filmmakers and audience and how cinematography might inform our conceptualisation of other imagined temporal worlds, including the afterlife. She examines the role of angels and vampires in contemporary cinema, as well as the distinctive time schemes of new media and their implications for rethinking time and the moving image through digitalisation. Broad based and accessible, *Stop the Clocks!* will appeal to a wide interdisciplinary audience and provides a useful sourcebook on undergraduate and postgraduate courses in film and other arts and media-based disciplines.

Also included are descriptions of the demonic and diabolical members making up the hierarchy of Hell and the numerous species of demons that, according to various folklores, mythologies, and religions, populate the earth and plague mankind. - Three hardcover volumes in slipcase
- Corrects the many mistranslations, copyist mistakes, and errors introduced from other editions, drawing on new research and access to Agrippa's source texts
- Restores all of Agrippa's original illustrations
- Presents a nearly complete bibliography of Agrippa's primary sources

One of the most important texts in the Western magical tradition for nearly 500 years, Heinrich Cornelius Agrippa's 1533 work *Three Books of Occult Philosophy* collates a multitude of sources from the Classical, Medieval, and Renaissance periods and organizes them into a coherent explanation of the magical world. Divided into three parts--the natural world, the celestial world, and the divine world--the book systematically explains the philosophy, logic, and methods of magic and astrology and how they work. The basis for 19th-century magical orders such as the Golden Dawn and a primary source for countless books on magical uses of stones, herbs, incense, and astrology, Agrippa's many lists and diagrams have proven invaluable to magicians since the 16th century. Yet, until now, all English editions of Agrippa's *Three Books* were based on the same flawed 1651 translation from the mysterious "J.F." In this new translation from the original 1533 Latin edition, Eric Purdue corrects the many mistranslations, copyist mistakes, and errors introduced from other editions as well as restores all of Agrippa's original illustrations. Purdue notates every correction and offers commentary, drawing on major developments in the research of older magical and astrological texts. He also presents a nearly complete bibliography of Agrippa's primary sources, revealing Agrippa as a mainstream scholar of his day. Presenting the first new English translation of *Three Books of Occult Philosophy* in more than 350 years, this three-volume hardcover boxed set repairs the gaps in knowledge pervasive in the original translation and restores the magical spirit of Agrippa's masterpiece, allowing us to hear Agrippa speak again.
