Configuring IP Multicast Routing - Cisco

File Type PDF Configuring Multicast Routing Cisco

Cisco recommends that you use Protocol Independent Multicast (PIM) sparse mode, particularly Auto-RP, where possible and especially for new deployments. However, if dense mode is desired, configure the global command `ip multicast-routing` and the interface command `ip pim sparse-dense-mode` on each interface that needs to process multicast traffic.

Multicast Quick-Start Configuration Guide - Cisco

The first command that you perform in Global Configuration mode is the `ip multicast-routing` command, which enables multicast routing for the router. Enabling multicast routing initially does not route any data, due in fact that the default configuration leaves all router interfaces without multicast routing in their configuration. To have multicast routing in a working configuration, you must enter each interface and configure the PIM on those interfaces.

Multicast Routing Configuration - dummies

Configuring IP Multicast Routing This chapter describes how to configure IP multicast routing on the Cisco ME 3800X and ME 3600X switch. IP multicasting is a more efficient way to use network resources, especially for bandwidth-intensive services such as audio and video.

Configuring IP Multicast Routing - Cisco

Perform these configurations to enable multicast routing on a router: Issue the `ip multicast-routing` command globally on the router. Enable PIM sparse or dense mode, by issuing the `ip pim sparse-dense-mode` command on all the multicast interfaces. In the case of sparse mode, a Rendezvous Point (RP) ...

Solved: Hello My multicast knowledge is basic, I understand the concepts but have not done a huge amount of configuration. Anyway, we have a system a CCTV system which uses multicast for the video streams. The 'sender' for want of a better word and

Solved: Multicast Configuration? - Cisco Community

if you are running routing n the 2960x with the `sdm prefer routing` command it looks like multicast routing is omitted from the configuration guides so my guess is it is not supported. Typically on a L3 switch you will need the following: `ip multicast routing dist` (enables multicast routing) <per interface you need PIM on> `ip pim sparse-mode` <or ...

Solved: Configuring Multicasting on a 2960x - Cisco Community

you will need an SVI on the servers vlan in order to be able to do unicast and multicast routing from/to that vlan to the rest of the network. CGMP is quite obsolete and IGMP snooping should be enough for your needs. You can use `ip pim sparse-dense mode` on the C4500 SVIs with a

Cisco Content Hub - IP Multicast Routing Technology Overview

For a vEdge router located at a site that contains one or more multicast sources, you enable PIM on the service-side interface or interfaces. These are the interfaces that face the local-site network. You enable PIM per VPN, so you must configure PIM and PIM interfaces for all VPNs support multicast services.
