American Critical Care Transport . When you are in need of any type of medical transportation, help is just a phone call away. American Critical Care Transport is here to serve you 24/7 every day of the year. What sets us apart from the competition is our committment to superb quality in every aspect of what we do. We commit to you to provide high quality patient care regardless of your level of care or your ability to pay.

American Critical Care Transport

The critical care transport team should include at least one nurse and another provider, usually a paramedic but also could be another nurse, a physician, a nurse practitioner, a physician assistant, or a respiratory therapist. These transport teams typically provide nearly the same level of care as the unit to which the patient is being moved.

This guide is designed with the special needs of field practitioners in mind. This useful, quick reference guide helps speed recognition of lab values, 12 lead ECG interpretation, fibrinolytics agents, hemodynamic monitoring, IABP's, rapid sequence intubation, chest tubes, and therapeutic medications and toxicology for the critical care transport provider.

As a registered nurse for the last 28 years, my primary clinical expertise has been working in the pre-hospital environment as a flight nurse and a paramedic, as well as continuing to work in a variety of clinical areas which include the emergency department, pediatrics and endoscopy. My extensive clinical background has also given me the opportunity to work as a legal nurse consultant with one of the largest law firms in Arizona. As an EMS educator and program director of paramedic

training programs for the last 20 years and most recently as the National Clinical Educator for one of the largest air medical transport companies, I truly enjoy teaching in a simple manner as to assure that students do have a strong basic understanding in making critical care decisions and that they will be providing the highest quality of patient care beginning from the least to the most invasive management of care for the patients they are transporting. My goal as a professional and as an EMS educator has always been and will continue to encourage students to have the desire to learn and grow in their profession, as well as contribute to EMS in a way that inspires positive change. "Tell me and I'll forget; Show me and I may remember; Involve me and I'll understand" www.backtobasicscourse.com

"Based on the National EMS Education Standards and the 2015 CPR/ECC Guidelines, the Eleventh Edition offers complete coverage of every competency statement with clarity and precision in a concise format that ensure students' comprehension and encourages critical thinking. New cognitive and didactic material is presented, along with new skills and features, to create a robust and innovative EMT training solution."--Back cover.

Whether you're caring for patients on the ground or in the air, Patient Transport: Principles & Practice, 5th Edition is an essential tool for your success in transport nursing. Developed by ASTNA, this trusted, one-of-a-kind resource has been extensively revised to keep you up-to-date with the latest technological advances, and help you meet the ever-changing needs of this critical nursing field. Comprehensive overviews familiarize you with the most common conditions and injuries encountered in practice, accompanied by important management considerations to help you ensure the most effective communication and the safest patient care in all transport settings. In addition, expanded content on bariatrics are featured throughout the book, along with 350 online questions and answers mapped to the CRFN/CTRN® exams. Expanded coverage of injuries commonly encountered in flight and ground nursing includes pathophysiology, assessment, planning, implementation, and evaluation discussions. Information based on the latest updates from the Federal Aviation Association and the National Transportation Safety Board alerts you to important safety regulations. Meets the needs of all healthcare providers dedicated to expert care delivery in transport, including paramedics, physicians, respiratory therapists, pilots, mechanics and communication specialist. Detailed coverage of management issues includes scene management, communication, safety, disaster management/triage, quality management, and marketing/public relations. NEW! Extensive revisions throughout text includes detailed objectives for every chapter, expanded content on bariatrics, and updates to chapters including Scene Operations and Safety, Neurologic Trauma, Patient Safety, and Shock. NEW! Real-life scenarios with updated technology demonstrate how to apply concepts to scenarios similar to those you'll encounter in practice. NEW! Focus on interprofessional and collaborative nature of transport, emphasizes the importance of teamwork in ensuring successful patient outcomes. NEW! Evolve site with 350 questions and answers mapped to the CRFN/CTRN® provide additional online preparation.

Whether you're caring for patients on the ground or in the air, this trusted, one-of-a-kind resource is an essential tool for your success in transport nursing. The 4th edition has been extensively revised to keep you up to date with the latest technological advances and help you meet the ever-changing needs of this critical nursing field. Comprehensive overviews familiarize you with the most common diseases and injuries encountered in practice, accompanied by important management considerations to help you ensure the most effective communication and the safest patient care in all transport settings. Case studies presented at the end of each clinical chapter demonstrate how to apply concepts to scenarios similar to those you'll encounter in practice. Special Populations Unit helps you meet the unique care needs of pregnant, neonatal, pediatric, and military patients. Competencies listed at the beginning of each chapter help you identify key components of effective patient care. Collaborative, multidisciplinary focus meets the educational and reference needs of all transport health care providers and emphasizes the importance of teamwork in ensuring successful patient outcomes. 3 new chapters highlight emerging trends in transport care: The Use of Technology During Transport, including ventricular assist devices, a chapter devoted to Mechanical Ventilation, and Military Transport with EnRoute care. Updated content throughout provides a balance of ground and air coverage and reflects the recently published Flight and Ground Transport Nursing Core Curriculum to help you prepare for the CTRN or CFRN examination. Expanded disaster management coverage addresses front-line response to major disasters. Expanded disaster management coverage addresses important concerns for improving front-line response to major disasters. Additional pathophysiology content helps you better understand the effects of diseases and injuries on the body's normal physiologic processes. Clear instructions for reading radiographs and CT scans simplify the use of these diagnostic tools and help you improve related outcomes. Information based on the latest updates from the Federal Aviation Association and the National Transportation Safety Board alerts you to important safety regulations. Obesity considerations included in the Patient Assessment and Preparation for Transport chapter outline special challenges and possible solutions for the care of obese patients.
