During the 1970s, psychologist Paul Ekman identified six basic emotions that he suggested were universally experienced in all human cultures. The emotions he identified were happiness, sadness, disgust, fear, surprise, and anger. He later expanded his list of basic emotions to include such things as pride, shame, embarrassment, and excitement.

**Emotion | Definition of Emotion at Dictionary.com**

e • mo • tion. ( mō n) n. 1. an affective state of consciousness in which joy, sorrow, fear, etc., is experienced, as distinguished from cognitive and volitional states of consciousness. 2. any of the feelings of joy, sorrow, hate, love, etc. 3. a strong agitation of the feelings caused by experiencing love, fear, etc.

**Emotion - definition of emotion by The Free Dictionary**

a strong feeling such as love or anger, or strong feelings in general: Like a lot of men, he finds it hard to express his emotions. My mother was overcome with emotion and burst into tears.

**EMOTION | meaning in the Cambridge English Dictionary**

The fact that emotions involve behaviour, thoughts, and culture raises the question of whether or to what extent emotions are rational. For philosophers such as Plato (c. 428 – c. 348 bce) and David Hume (1711 – 76), who conceived of emotion and rationality as conflicting opposites, such a question was inappropriate from the start.

**Emotion - Emotions and rationality | Britannica**

Definition of emotion. 1 a : a conscious mental reaction (such as anger or fear) subjectively experienced as strong feeling usually directed toward a specific object and typically accompanied by physiological and behavioral changes in the body. b : a state of feeling.
