description

Interference Of Engineering Physics Light Interference Of Light

The experiments on interference and diffraction have shown that light is a form of wave motion. But these effects, do not give an idea about the type of wave motion. The phenomenon of

Acces PDF Engineering

polarization has helped to establish that light waves are transverse in nature. Production of plane polarized light

Interference
Preconditions 1. Light must be

Acces PDF Engineering

monochromatic, i.e., involve just a single frequency (single wavelength). 2. Light sources must be coherent, the relative phase is always the same. 3. Light sources must have the same amplitudes. If these conditions do not hold, one still gets constructive and destructive

When two light waves superimpose, then the resultant amplitude or intensity in the region of superposition is different than the amplitude of individual waves. Definition:-.

The modification in the distribution of intensity in the region of superposition is known as interference.
