¶Collaborative Product and Service Life Cycle Management for a Sustainable World¶ gathers together papers from the 15th ISPE International Conference on Concurrent Engineering (CE2008), to stimulate the new thinking that is so crucial to our sustained productivity enhancement and quality of life. It is already evident in this new century that the desire for sustainable development is increasingly driving the market to reach for new and innovative solutions that more effectively utilize the resources we have inherited from previous generations; with the obvious responsibility to future generations. Human productivity and progress can be positively engineered and managed in harmony with the provision and needs of our natural environment. One century on from the industrial revolution, this is now the time of the sustainable revolution; requiring holistic technological, process and people integrated solutions to sustained socio-economic enhancement.

Covering New York, American & regional stock exchanges & international companies.

During the British Mandate for Palestine (1922¶1948), Arabs and Jews repeatedly used the law to gain leverage and influence international opinion, especially in three dramatic and largely forgotten trials involving two issues: the interplay between conflicting British promises to the Arabs and Jews during World War I, and the parties¶ rights and claims to the Wailing Wall. Focusing on how all three parties ¶ Arab, Jewish, and British ¶ used the law and the legal process to advance their objectives during the Mandate years, this volume reveals how the parties availed themselves ¶ with varying degrees of success ¶ of the law and the legal process. The book examines various legal arguments they proffered, and how that early tendency to resort to the law as a tool, a resource, and a weapon in the conflict has continued to this day. The research relies almost entirely on primary source documents, including transcripts of the public and secret testimony before the Shaw, Lotgren, and Peel Commissions, diaries, letters, government files, and other original sources. This study explores the origins of many of the fundamental legal arguments in the Arab¶Israeli conflict that prevail to this day. Filling a gap in research, this is a key text for scholars and students interested in the Arab¶Israeli conflict, Lawfare, and the Middle East.

Includes Part 1, Number 1 & 2: Books and Pamphlets, Including Serials and Contributions to Periodicals (January - December)

For Stirling engines to enjoy widespread application and acceptance, not only must the fundamental operation of such engines be widely understood, but the requisite analytic tools for the stimulation, design, evaluation and optimization of Stirling engine hardware must be readily available. The purpose of this design manual is to provide an introduction to Stirling cycle heat engines, to organize and identify the available Stirling engine literature, and to identify, organize, evaluate and, in so far as possible, compare non-proprietary Stirling engine design methodologies. This report was originally prepared for the National Aeronautics and Space Administration and the U. S. Department of Energy.

Soils and sediments influence current processes, preserve evidence of past processes, indicate evolutionary phases in landscapes and provide a basis for relative and absolute chronologies. They provide an important key to the integration of short-term process studies and investigation of longer-term landform evolution. This book, first published in 1985, has been arranged to provide wide temporal and spatial coverage, with studies ranging from historic to geologic time scales and micro- to macro-spatial scales. The interdisciplinary nature of the subject is reflected in contributions from soil scientists, engineering geologists, hydrologists and geomorphologists.
