Katie rated Human Relations The Art and Science of Building Effective Relationships 1st edition really liked it Mar 03, Psychology, Science, and Human Relations.

Relationships are the very foundation of our lives. Whether personal or professional, our ability to understand and communicate effectively with the people in our lives can make the difference between a satisfying, fulfilling life and one filled with tension and frustration. With this in mind, it's suprising that so few of us take the time to critically examine the makeup and workings of these connections. This text examines human relations by integrating key components of successful relationships: internal influences on thoughts, feelings, and behaviors ; external or sociocultural influences and communication principles and skill building. These main features help drive students towards better understanding and more effective communication within all of their relationships.

This is the eBook of the printed book and may not include any media, website access codes, or print supplements that may come packaged with the bound book. For courses in Adjustment, Interpersonal Behavior, and Human Relations A conceptual and skills-based overview of relationship building in today ' s world Human Relations: The Art and Science of Building Effective Relationships helps students learn how to communicate more effectively within all of their personal and professional relationships. Employing a three-tiered approach to human relations, author Vivian McCann helps students to understand the psychological concepts that underlie relationships, to build the skills needed to communicate effectively, and to consider the influence of cultural norms and backgrounds throughout the relationship-building process. Revised to reflect the latest data and research, the Second Edition also includes updated information about how new technologies have greatly impacted today ' s relationships. NOTE: This ISBN is for a Pearson Books a la Carte edition: a convenient, three-hole-punched, loose-leaf text. In addition to the flexibility offered by this format, Books a la Carte editions offer students great value, as they cost significantly less than a bound textbook. Human Relations: The Art and Science of Building Effective Relationships, Second Edition is also available via REVEL™, an interactive learning environment that enables students to read, practice, and study in one continuous experience.

Art and science work is experiencing a dramatic rise coincident with burgeoning Science and Technology Studies (STS) interest in this area. Science has played the role of muse for the arts, inspiring imaginative reconfigurations of scientific themes and exploring their cultural resonance. Conversely, the arts are often deployed in the service of science communication, illustration, and popularization. STS scholars have sought to resist the instrumentalization of the arts by the sciences, emphasizing studies of theories and practices across disciplines and the distinctive and complementary contributions of each. The manifestation of this commonality of creative and epistemic practices is the emergence of Art, Science, and Technology Studies (ASTS) as the interdisciplinary exploration of art–science. This handbook defines the modes, practices, crucial literature, and research interests of this emerging field. It explores the questions, methodologies, and theoretical implications of scholarship and practice that arise at the intersection of art and STS. Further, ASTS demonstrates how the arts are intervening in STS. Drawing on methods and concepts derived from STS and allied fields including visual studies, performance studies, design studies, science communication, and aesthetics and the knowledge of practicing artists and curators, ASTS is predicated on the capacity to see both art and science as constructions of human knowledge- making. Accordingly, it posits a new analytical vernacular, enabling new ways of seeing, understanding, and thinking critically about the world. This handbook provides scholars and practitioners already familiar with the themes and tensions of art–science with a means of connecting across disciplines. It proposes organizing principles for thinking about art–science across the sciences, social sciences, humanities, and arts. Encounters with art and science become meaningful in relation to practices and materials manifest as perceptual habits, background knowledge, and cultural norms. As the chapters in this handbook demonstrate, a variety of STS tools can be brought to bear on art–science so that systematic research can be conducted on this unique set of knowledge-making practices.

The number of ways in which humans interact with animals is almost incalculable. From beloved household pets to the steak on our dinner tables, the fur in our closets to the Babar books on our shelves, taxidermy exhibits to local zoos, humans have complex, deep, and dependent relationships with the animals in our ecosystems. In Displaying Death and Animating Life, Jane C. Desmond puts those human-animal relationships under a multidisciplinary lens, focusing on the less obvious, and revealing the individualities and subjectivities of the real animals in our everyday lives. Desmond, a pioneer in the field of animal studies, builds the book on a number of case studies. She conducts research on-site at major museums, taxidermy conventions, pet cemeteries, and even at a professional conference for writers of obituaries. She goes behind the scenes at zoos, wildlife clinics, and meetings of pet cemetery professionals. We journey with her as she meets Kanzi, the bonobo artist, and a host of other animal-artists—all of whom are preparing their artwork for auction. Throughout, Desmond moves from a consideration of the visual display of unindividuated animals, to mourning for known animals, and finally to the marketing of artwork by individual animals. The first book in the new Animal Lives series, Displaying Death and Animating Life is a landmark study, bridging disciplines and reaching across divisions from the humanities and social sciences to chart new territories of investigation.

Includes Part 1, Number 1 & 2: Books and Pamphlets, Including Serials and Contributions to Periodicals (January - December)

How can artist-scientist collaboration be of value to science and technology organizations? This innovative book is one of the first to address this question and the emerging field of art-science collaboration through an organizational and managerial lens. With extensive experience collaborating with and advising institutions to develop artist in residency programs, the author highlights how art-science collaboration is such a powerful opportunity for forward-thinking consultants, managers and institutions. Using real-life examples alongside cutting edge research, this book presents a number of cases where these interactions have fostered creativity and led to heightened innovation and value for organizations. As well as creating a blueprint for successful partnerships it provides insights into the managerial and practical issues when creating art-science programs. Invaluable to scholars and practitioners interested in the potential of art-science collaboration, the reader will be shown how to take an innovative approach to creativity in their organization or research, and the ways in which art-science collaborations can mutually benefit artists, scientists and companies alike.

The day isn't far off when no college student can graduate without having given serious thought to our relations with animals, and to how to make our relations with animals less detrimental for them. Animal studies, clearly, is a burgeoning field. Jane Desmond has been a pioneer in the field for years, conducting research onsite at major museums, taxidermy conventions, pet cemeteries, a professional conference for pet obituary writers, attending primatology meetings, and many behind-the-scenes visits to zoos as well as hands-on work with veterinary medicine, in which she has recently earned a degree. In this book, we accompany the author as she meets Kanzi the bonobo, watches an elephant paint, attends a weeklong training session on how to enrich the lives of animals in confinement, and helps prepare animal-made art for auction. Desmond focuses on the ways we relate to animals that underscore and highlight real animals with real individuality, and with their own subjectivities. The book plunges us into the world of museums (taxidermy), of pet cemeteries, of animal obituaries, of mourning and not mourning (including roadkill as objects), and also of art markets in animal-generated art. She is committed to preserving and informing our sense of (once) living, breathing, sweaty, noisy, moving animals active on the page. This is the inaugural volume in our new Animal Lives series, of which Desmond is the Directing Editor. This book beautifully exemplifies the series goal of bridging disciplines and reaching across divisions among the humanities and social sciences to chart new territories of investigation. "
