them. This volume is pertinent to our families, churches, even places of work. -- Marva J. Dawn  
author of Truly the Community

Today's marketplace is fueled by knowledge. Yet organizing systematically to leverage knowledge remains a challenge. Leading companies have discovered that technology is not enough, and that cultivating communities of practice is the keystone of an effective knowledge strategy. Communities of practice come together around common interests and expertise- whether they consist of first-line managers or customer service representatives, neurosurgeons or software programmers, city managers or home-improvement amateurs. They create, share, and apply knowledge within and across the boundaries of teams, business units, and even entire companies- providing a concrete path toward creating a true knowledge organization. In *Cultivating Communities of Practice*, Etienne Wenger, Richard McDermott, and William M. Snyder argue that while communities form naturally, organizations need to become more proactive and systematic about developing and integrating them into their strategy. This book provides practical models and methods for stewarding these communities to reach their full potential- without squelching the inner drive that makes them so valuable. Through in-depth cases from firms such as DaimlerChrysler, McKinsey & Company, Shell, and the World Bank, the authors demonstrate how communities of practice can be leveraged to drive overall company strategy, generate new business opportunities, tie personal development to corporate goals, transfer best practices, and recruit and retain

top talent. They define the unique features of these communities and outline principles for nurturing their essential elements. They provide guidelines to support communities of practice through their major stages of development, address the potential downsides of communities, and discuss the specific challenges of distributed communities. And they show how to recognize the value created by communities of practice and how to build a corporate knowledge strategy around them. Essential reading for any leader in today's knowledge economy, this is the definitive guide to developing communities of practice for the benefit-and long-term success-of organizations and the individuals who work in them. Etienne Wenger is a renowned expert and consultant on knowledge management and communities of practice in San Juan, California. Richard McDermott is a leading expert of organization and community development in Boulder, Colorado. William M. Snyder is a founding partner of Social Capital Group, in Cambridge, Massachusetts.

Christine D. Pohl's book Making Room: Recovering Hospitality as a Christian Tradition has helped foster renewal of the central but long-neglected practice of Christian hospitality. This new study guide for Making Room provides a variety of ways in which people can learn more about the practice. Designed for use by small groups -- though individuals will also profit from it -- the study guide is divided into nine lessons corresponding to the chapters of Making Room. Each lesson begins with an introduction briefly highlighting the main points of the book, followed by sections on group building, Scripture, discussion, reflection, and

personal application. Each lesson also provides aids for group leaders and suggested activities to help participants begin to make the practice of hospitality part of their daily life.

Suggests that modern religion is too fast paced and that a slower approach should be used so that parishioners get a more fulfilling experience.

On the necessity of boundary-crossing friendships for Christian discipleship Friendship isn't always given a lot of thought—and lately, it doesn't get a lot of time and effort, either. But in a world of busy and isolated lives, in which friendships can too easily become shallow, tenuous, and homogeneous, Dana Robert insists that good friendships are a vital and transformative part of the Christian life—a mustard seed of the kingdom of God. She believes Christians have the responsibility—and opportunity—to be countercultural by making friends across cultural, racial, socioeconomic, and religious lines that separate people from each other. In this book Robert tells the stories of Christians who, despite or even because of difficult circumstances, experienced friendship with people unlike themselves as “God with us,” as exile, as testimony, and as celebration. Jesus was a friend to his disciples. Through Jesus's life and the lives of his followers down through the ages, Faithful Friendships shows readers how friendship can become life-changing—and even worldchanging.

This book presents a theory of learning that starts with the assumption that engagement in social practice is the fundamental process by which we get

# Read Online Living Into Community Cultivating Practices That Sustain Us

to know what we know and by which we become who we are. The primary unit of analysis of this process is neither the individual nor social institutions, but the informal 'communities of practice' that people form as they pursue shared enterprises over time. To give a social account of learning, the theory explores in a systematic way the intersection of issues of community, social practice, meaning, and identity. The result is a broad framework for thinking about learning as a process of social participation. This ambitious but thoroughly accessible framework has relevance for the practitioner as well as the theoretician, presented with all the breadth, depth, and rigor necessary to address such a complex and yet profoundly human topic.

Philip Kenneson digs into the fruit of the Spirit listed in Galatians 5:22-23, combining rich, theologically grounded reflection on Christian life and practice with analysis of contemporary culture. He explores what each fruit means in its biblical context, then investigates how key traits of late modern Western culture inhibit the development and ripening of each fruit.

In this new edition of his popular book, Craig Dykstra explores the contributions of the traditions, education, worship practices, and disciplines of the Reformed Christian community in helping people grow in faith. In doing so, he makes the case that the Christian church, in its own traditions, has a wealth of wisdom about satisfying spiritual hunger and the desire to know God deeply--wisdom that offers coherent, thoughtful guidance in such diverse settings as

Congregational life, families, youth groups, and higher education.

Churches have tried all kinds of ways to attract new and younger members - revised vision statements, hipper worship, contemporary music, livelier sermons, bigger and better auditoriums. But there are still so many people who aren't being reached, who don't want to come to church. And the truth is that attendance at church on Sundays does not necessarily transform lives; God's presence in our hearts is what changes us. Leaders and laypeople everywhere are realizing that they need new and more powerful ways to help them spread God's Word. According to international church starter and pastor Neil Cole, if we want to connect with young people and those who are not coming to church, we must go where people congregate. Cole shows readers how to plant the seeds of the Kingdom of God in the places where life happens and where culture is formed - restaurants, bars, coffeehouses, parks, locker rooms, and neighborhoods. *Organic Church* offers a hands-on guide for demystifying this new model of church and shows the practical aspects of implementing it.

Every student asks questions about life beyond the classroom—how can I discern my vocation? How should I understand marriage and sex? What happens if I doubt my faith? To help students navigate these life questions, Gary M. Burge and David Lauber have gathered insights from Christian faculty who draw on their own conversations with students during office hours and over coffee.
