The Bond. By

international

bestselling author

Lynne McTaggart,

The Bond is the

culmination of her

groundbreaking work.

It offers a completely

new, scientific story of

life and the human

experience, one that

challenges the very

way we conceive of

Online Library Lynne

ourselves and our world. The Bond shows that the essential impulse of all life is a will to connect rather than a drive to compete. In fact, we are inescapably connected, hardwired to each other at our most elemental level—from cells to whole societies. The

Online Library

Lynne

desire to help others is so necessary that we experience it as one of our chief pleasures, as essential as eating and having sex, and we succeed and prosper only when we see ourselves as part of a greater whole. Every conflict that occurs—whether between husband and

Online Library Lynne

wife, social or racial groups, or nations—is resolved only when we can fully see and embrace the space—the bond—between us. McTaggart offers detailed recommendations to help foster more holistic thinking, more cooperative relationships, and

Online Library

Lynne

more unified social groups. Blending interviews and human stories into an absorbing narrative, she shows how:

- A simple daily practice conditions the brain to enable you to become more empathetic toward others
- A new way of speaking and listening can overcome

Online Library

Lynne

polarization, helping the staunchest of enemies to become close friends • People who fire together wire together: Whenever a group works together for a common goal, the brains of all parties begin to get on the same wavelength, strengthening the bond within the group

- Fairness is more

Online Library Lynne

powerful than The
unfairness: A small
group of individuals
committed to strong
reciprocity can
“invade” a population
of self-interested
individuals and create
a fairer society The
Bond offers a
breathtaking,
visionary plan for a
new way to live, in
harmony with our true

nature and with each other, and a new way to heal our relationships, our neighborhoods, and our world.
