Making great audio recordings requires striking the right balance between technical know-how and practical understanding of recording

sessions. Even in the digital age, some of the most important aspects of creating and recording music are non-technical and, as a result, are often overlooked by traditional recording manuals. The Art of Digital Audio Recording teaches readers what they really need to know in order to make great sound recordings with computers - both the practical and the technical information, including: ? What to look and listen for in a recording environment ? Straightforward advice on recording almost any instrument ? Essentials of digital audio workstations ? Essentials of recording gear: microphones, mixers, and speakers ? Fundamentals of understanding and applying EQ, compression, delay, and reverb ? Secrets to running creative recording sessions ? Practical application of digital editing, mixing, and mastering A special section identifies solutions to the most common challenges in the recording studio, and the book also features an addendum with essential tips and reference information including: ? How to walk into a commercial studio and be the engineer ? Researching and buying gear: Internet vs. brick and mortar ? Digital formats: A handy reference As a whole, The Art of Digital Audio Recording is an essential resource that gives recordists the tools they need to let technical understanding serve greater musical goals.

This book focuses on evidence-based standards for simulation in nursing education. The foundational principle of simulation excellence and its relevance to nursing is defined and infuses throughout the book. It also discusses necessary components for quality simulation from development to implementation. These areas include (but are not limited to): theoretical background, accreditation and approval standards, the simulation environment, developing and implementing simulations, and debriefing. These subject areas are approached following a thorough review of the literature and current practices identified from the International Nursing Association for Clinical Simulation and Learning (INACSL), Society for Simulation in Healthcare (SSH), National League for Nursing (NLN) and State Boards of Nursing. This quick reference title will become the best practice standards for simulation excellence in nursing education.
