In colorimetry, the Munsell color system is a color space that specifies colors based on three properties of color: hue (basic color), chroma (color intensity), and value ( ). It was created by Professor Albert H. Munsell in the first decade of the 20th century and adopted by the United States Department of Agriculture (USDA) as the official color system for soil research in the 1930s.

Companions in Motion. We are blessed by their loyalty and their desire to always be with us. Their joy, love and playfulness inspire us. Allow me to capture the essence of who they are as they romp, frolic, and explore by letting me spend some time with you and your pup on a walk, hike or any kind of an outing.
