**Radio Antenna Engineering: Laport,
Edmund: Amazon.sg: Books**

Radio masts and towers are typically tall structures designed to support antennas for telecommunications and broadcasting, including television. There are two main

Access Free Radio Antenna Engineering By Edmund A

Report 1952
types: guyed and self-supporting structures. They are among the tallest human-made structures. Masts are often named after the broadcasting organizations that originally built them or currently use them. In the case of a mast radiator or radiating tower, the whole mast or tower is itself the transmitting antenna.
