Price theory has provided solutions to myriad problems affecting society without invoking any precepts beyond those encapsulated in the standard economic postulate. Fiscal theory, meanwhile, has been closely attentive to the political, sociological and historical circumstances that bear upon the fiscal act. This methodological duality has resulted in the development of fiscal theory in line with the political culture espoused by its originator, usually the one prevailing at home. Thus emerges the need for an analysis of the evolution of fiscal thought along national lines.

Market-Driven Management adopts a broad approach to marketing, integrating the strategic and operational elements of the discipline. Lambin's unique approach reflects how marketing operates empirically, as both a business philosophy and an action-oriented process. Motivated by the increased complexity of markets, globalisation, deregulation, and the development of e-commerce, the author challenges the traditional concept of the 4Ps and the functional roles of marketing departments, focusing instead on the concept of market orientation. The book considers all of the key market stakeholders, arguing that developing market relations and enhancing customer value is the responsibility of every member of the organization, and that the development of this customer value is the only way for a firm to achieve profit and growth. New to this edition: - Greater coverage of ethical issues and corporate social responsibility; cultural diversity; value and branding and the economic downturn - Broad international perspective - Thoroughly revised to reflect the latest academic thinking and research With its unique approach, international cases and complementary online resources, this book is ideal for postgraduate and upper level undergraduate students of marketing, and for MBAs and Executive MBAs.
