THE classic work about decision-making from the world-renowned writer and philosopher Edward de Bono Meetings are a crucial part of all our lives, but too often they go nowhere and waste valuable time. In Six Thinking Hats, Edward de Bono shows how meetings can be transformed to produce quick, decisive results every time. The Six Hats method is a devastatingly simple technique based on the brain's different modes of thinking. The intelligence, experience and information of everyone is harnessed to reach the right conclusions quickly. These principles fundamentally change the way you work and interact. They have been adopted by businesses and governments around the world to end conflict and

confusion in favour of harmony and productivity.

Edward de Bono's Six Thinking Hats is the groundbreaking psychology manual that has inspired organisations and individuals all over the world. De Bono's innovative guide divides the process of thinking into six parts, symbolized by the six hats, and shows how the hats can dramatically transform the effectiveness of meetings and discussions. This is a book to open your mind, unleash your creativity and change the way you think about thinking.

The internationally bestselling guide to better thinking used by tens of thousands of people - fully revised and updated.

A leading authority on lateral thinking streamlines the decision-making process by identifying the central aspects of problem-solving and, by using real-life scenarios, describes how to focus thinking on each aspect individually, then link them into a productive progression.

People spend a fortune on their bodies, their faces, their hair, their clothes. Cosmetics, plastic surgery, diets, gym membership - everyone's trying to be more attractive. But there's an easier way to become a beautiful person. It doesn't have to be physical. No matter how you look, if you have a mind that's fascinating, creative, exciting - if you're a good thinker - you can be beautiful. And being attractive doesn't necessarily come from being intelligent or highly-educated. It isn't about having a great personality. It's about using your imagination and expanding your creativity. And it's when talking with people that we make the greatest impact. A person may be physically beautiful, but when speaking to others a dull or ugly or uncreative mind will definitely turn them off. In clear, practical language, de Bono shows how by applying lateral and parallel thinking skills to your conversation you can improve your mind. By learning how to listen, make a point, and manoeuvre a discussion, you can become creative and more appealing - more beautiful.

The internationally bestselling guide to better thinking used by tens of thousands of people - fully revised and updated. The need for the Six Hats is based on an understanding of how the brain chemicals change with the mode of thinking. Using this method one major corporation reduced the time taken for multinational project discussions from thirty days to just two days. Argument is inefficient, ineffective and extremely slow. Argument was never designed to be constructive. The parallel thinking of the six hats is rapidly replacing argument around the world. For two-thousand-four-hundred years we have been content with argument which was never designed to be constructive. Discovering 'what is' may not be the same as designing 'what can be'.

Western thinking is failing because it was not designed to deal with change In this provocative masterpiece of creative thinking, Edward de Bono argues for a game-changing new way to think. For thousands of years we have followed the thinking system designed by the Greek philosophers Socrates, Plato and Aristotle, based on analysis and argument. But if

we are to flourish in today's rapidly changing world we need to free our minds of these 'boxes' and embrace a more flexible and nimble model. Parallel Thinking is an invaluable insight into the world of creativity; de Bono unveils unique methods of brainstorming and explains preconceived ideas of what creativity involves and is. This book is not about philosophy; it is about the practical (and parallel) thinking required to get things done in an ever-changing world.

This book is open access under a CC BY-NC 3.0 IGO license. This book comprehensively covers topics in knowledge management and competence in strategy development, management techniques, collaboration mechanisms, knowledge sharing and learning, as well as knowledge capture and storage. Presented in accessible "chunks," it includes more than 120 topics that are essential to high-performance organizations. The extensive use of quotes by respected experts juxtaposed with relevant research to counterpoint or lend weight to key concepts; "cheat sheets" that simplify access and reference to individual articles; as well as the grouping of many of these topics under recurrent themes make this book unique. In addition, it provides scalable tried-and-tested tools, methods and approaches for improved organizational effectiveness. The research included is particularly useful to knowledge workers engaged in executive leadership; research, analysis and advice; and corporate management and administration. It is a valuable resource for those working in the public, private and third sectors, both in industrialized and developing countries.

Traditional thinking habits of businesses need to be greatly improved. Analysis and judgement are no longer enough to make important corporate decisions; you can analyse the past but you have to design the future. Corporate decisions depend on values. Disputes and conflicts often arise because of a clash of those values; each party in the dispute wants to pursue its own values, often at the expense of the other party. It is therefore essential that companies, managers and employees have a full understanding of the values of everyone involved to design a way forward that benefits all parties. From the bestselling author of *How to Have a Beautiful Mind* and *Six Thinking Hats*, this groundbreaking business book provides a basis for value assessment, an essential tool in decision-making for 21st century corporations. De Bono demonstrates that values come into all areas of thinking, behaviour and decision-making and outlines a framework to focus employees' attention on a variety of values including human values, organisational values, cultural values and perceptual values. By introducing a scoring system to rate different values as strong, sound, weak or remote de Bono helps readers to prioritise and make executive decisions that count.
