facing this problem, believing that mental health, conceived as the absence of mental illness, automatically insures the making of right and safe choices in one's conduct of life. But the facts are all the other way.

The Myth of Mental Illness by Thomas Szasz

Myth #6: Mental illness is a sign of weakness. Fact: Mental illness does not occur because of weakness. Many people who do not struggle with mental illness think that having a mental health condition somehow indicates that a person who does is weak. This stigma is due, in part, to the fact that mental illness cannot be seen or easily diagnosed. Because of this, people tend to assume that ...
