Based on an acclaimed professor's legendary strategy course at Harvard Business School, The Strategist offers a radically new perspective on a leader's most vital role. "Are you a strategist?" That's the first question Cynthia Montgomery asks the business owners and senior executives from all over the world who participate in her highly regarded executive education course. It's not a question they anticipate or care much about on opening day. But by the time the program ends, they cannot imagine leading their companies to success without being—and living the role of—a strategist. Over a series of weeks and months, Montgomery puts these accomplished executives through their paces. Using case discussions, after-hours talks, and participants' own strategy dilemmas, she illuminates what strategy is, why it's important, and what it takes to lead the effort. En route, she equips them to confront the most essential question facing every business leader: Does this company truly matter? In doing so, she shows that strategy is not just a tool for outwitting the competition; it is the most powerful means a leader has for shaping a company itself. The Strategist exposes all business leaders—whether they run a global enterprise or a small business—to the invaluable insights Montgomery shares with these privileged executives. By distilling the experiences and insights gleaned in the classroom, Montgomery helps leaders develop the skills and sensibilities they need to become strategists themselves. It is a difficult role, but little else one does as a leader is likely to matter more.

From ancient battlefields to the modern business landscape, competitors have tried innumerable approaches to conquering adversaries. Success for the victors has taken many forms and traveled many paths, but at its heart, winning strategy can be boiled down to ten universal principles. When learned and implemented, these principals become powerful drivers of business excellence. Renowned strategy expert William A. Cohen, whose considerable experience in the military, corporate, and academic sectors forms the basis for The Art of the Strategist, presents the timeless lessons of: * commitment to a definite objective * seizing and maintaining the initiative * economization to mass (concentration of resources) * positioning * surprise * multiple simultaneous alternatives * the indirect approach * simplicity * timing * exploiting success With examples including the conquests of Hannibal and Alexander the Great, the political triumphs of Bill Clinton, George W. Bush, and Arnold Schwarzenegger, and the business successes of internet giant VeriSign and other high-profile companies, The Art of the Strategist proves how superior strategy trumps other factors in almost every competitive arena. The ten lessons in turn form a roadmap to decisive victory in business.

A pivotal shift in business strategy-making is taking place, assert Stephen Wall and Shannon Rye Wall. Strategy, once the exclusive province of senior management, is now the responsibility of people at every level in today's most forward-looking companies. Drawing on a ten-year study of more than 200 firms such as AT&T, 3M, The Geon Company, and Ritz Carlton Hotels, which included questionnaires and interviews with more than 4,000 line managers and human resource professionals, the authors demonstrate how companies can incorporate the experience of every employee to become more focused, more competitive, and more responsive to changing markets. Challenging the conventional wisdom about leadership in the '90s, the Walls go beyond the boardroom to discuss how to get people involved in the strategic process by moving the responsibility for planning to lower levels and by building a participatory culture based on listening. Debunking the common myth that strategy must precede tactics, the Walls show how adopting a more flexible approach to the strategic development process can balance openness to new opportunities and the need to make decisions quickly with the need to maintain longer-term strategic focus. Having shown how corporate structure can be amended to encourage participation within a more open planning approach, the Walls define new strategy-making roles for every employee -- from the front-line representative who serves as the voice of the customer to the senior executive who shapes basic purpose and direction. Key skills are presented to guide strategic thinking within companies at every stage of development, from new "eagle" ventures to businesses in "circled wagons" crisis mode. These skills are reinforced with a discussion of the core tactics needed to gain crucial support for strategic initiatives. Finally, the authors show how cross-functional teams are strengthening corporate direction by making inclusive and fully informed decisions on a cooperative basis. As companies expand their thinking to accommodate the needs of the new global marketplace, they are recognizing the benefits of tapping the diversity in their own backyards: the insights, experiences, and recommendations of their own associates. By involving leaders at all levels in the art of collaborative strategy-making, more and more companies can discover the possibilities that can chart their path to future success. This book shows new strategists how to lead the way.

What kind of leaders will the world need over the next thirty-five years? How will our knowledge of leadership, leadership development, and leadership education change? Leadership 2050 examines the issues, drivers, and contexts that will most likely influence leaders in the coming decades.

If you had the opportunity to probe the future, make strategic choices, and view their consequences before making expensive and irrevocable decisions, wouldn't you take advantage of it? Of course you would. And in a world of asymmetrical conflict, security threats, intense global competition, and economic uncertainty, there is an even higher premium on road-testing plans and strategies—whether they're spearheaded by government organizations, transnational corporations, or emerging megacommunities. Wargaming for Leaders provides a methodology to get at the issues that one leader, no matter how visionary, cannot grasp on his or her own. How? By bringing together the real experts on the topic at hand to wage "cognitive warfare." Through tapping the collective wisdom surrounding an issue, experts can experience the future in a risk-free environment and find answers to questions that had not been on their radar—often with unexpected and startling results. With examples from the fields of military, corporate, and public policy, three wargaming developers from Booz Allen Hamilton deliver compelling insights on this problem-solving method, including fascinating details on how A large equipment manufacturer determined whether making a merger was strategically right for its business growth, as well as which technology investments it needed to drop A four-star U.S. general tested his war plan for Iraq and uncovered specific fixes that might have prevented a prolonged conflict An increasingly clogged air-traffic system faced a security-versus-convenience issue determined whether military airspace could be used during peak demand periods Wargaming allows organizations of every type and every size to organize information, plot out scenarios, and tap into the collective expertise of participants. The results allow everyone to identify and tackle obstacles, solve problems, and find new ways to innovate and further performance goals. Get ready for the battle of your organizational life—and prepare to reap the spoils of victory.

The sports industry is more complex than ever before, and succeeding within it now requires an equally dynamic approach. Teams and leagues across many sports face unprecedented competition in worldwide markets as the cost of doing business increases and traditional revenue streams face pressure. In light of these changes, the idea that winning championships is the key to organizational success is misguided. The Sports Strategist: Developing Leaders for a High-Performance Industry reveals which areas in the industry, unlike winning, can be controlled and maximized for consistent success. Aspiring leaders in the sports business will learn how to design identities, manage narratives, and maximize new technologies in order to implement business analytics and build public support. These techniques are vital to creating a successful sports organization that is ready to reap the benefits of winning when it does happen, without having to rely on it when it doesn't. In such a high-performance field, the demand for well-equipped leaders is great, and The Sports Strategist provides the necessary tools and techniques for their success.
