This book tells the full story of the seven Celica generations (from 1970 to date), and that of its close cousin the Supra with detailed coverage of all the road cars from the world's leading markets, and the story surrounding the many race and rally models based on the two vehicle lines. Written with the full co-operation of the factory in Japan (and various official sales organizations from around the globe), this truly is the definitive history of these sporting Toyotas. Written by an acclaimed motoring historian with full co-operation from the factory this is an extremely comprehensive reference containing well over 250 mainly color photographs. Contemporary advertising brochures and exhaustive appendices complete the package making this a vital addition to any enthusiast's library.

Excerpt: The A Series engines are a family of straight-4 internal combustion engines with displacement from 1.3 L to 1.8 L produced by Toyota Motor Corporation. The series has cast iron engine blocks and aluminum cylinder heads. The development of the series began in the late 1970s, when Toyota wanted to develop a completely new engine for the Toyota Tercel, successor of Toyota's K engine. The goal was to achieve good fuel efficiency and performance with a modern design. The A-series includes the first mass-production DOHC, four-valve-per-cylinder engine, the 4A-GE, and a later version of the same motor was one of the first production five-valve-per-cylinder engines. Toyota joint venture partner Tianjin FAW Xiali still produces the 1.3 L 8A and recently resumed production of the 5A. The 1.5 L 1A was produced between 1978 and 1980. All variants were belt-driven 8-valve counter-flow SOHC engine...

Numerous books have been written about Toyota's approach to workplace improvement; however, most describe Toyota's practices as case studies or stories. Designed to aid in the implementation of Lean manufacturing, *The Modern Theory of the Toyota Production System: A Systems Inquiry of the World's Most Emulated and Profitable Management System* explains that your organization already has what it takes to succeed with TPS and what's probably missing is balance. Bridging the gap between implementation and theory, this text is the first of its kind to use systems theory to study how the pieces of the Toyota Production System (TPS) work together to achieve this much needed balance. Lean practitioners will learn how to use system theory to improve overall decision making when applying Lean or Toyota-like management systems. Explaining that the glue that holds the pieces of TPS together is just as important as the pieces themselves, the book provides you with invaluable guidance in the implementation of Lean manufacturing from a management perspective. It outlines a blueprint to help you develop a clear understanding of how the pieces of TPS need to come together so you can achieve something greater than what's possible with the individual pieces.

detailing the concepts and providing practical examples for application that leaders need to bring Toyota's success-proven practices to life in any organization. The Toyota Way Fieldbook will help other companies learn from Toyota and develop systems that fit their unique cultures. The book begins with a review of the principles of the Toyota Way through the 4Ps model-Philosophy, Processes, People and Partners, and Problem Solving. Readers looking to learn from Toyota's lean systems will be provided with the inside knowledge they need to Define the companies purpose and develop a long-term philosophy Create value streams with connected flow, standardized work, and level production Build a culture to stop and fix problems Develop leaders who promote and support the system Find and develop exceptional people and partners Learn the meaning of true root cause problem solving Lead the change process and transform the total enterprise The depth of detail provided draws on the authors combined experience of coaching and supporting companies in lean transformation. Toyota experts at the Georgetown, Kentucky plant, formally trained David Meier in TPS. Combined with Jeff Liker's extensive study of Toyota and his insightful knowledge the authors have developed unique models and ideas to explain the true philosophies and principles of the Toyota Production System.

To be able to present a high-quality business report, I did detailed research on the company and its business environment. The information was gathered from: the company's Annual Report 2008/2009, the official website of Toyota and internal know-how of the company. The sources and the additional professional literature are quoted in the references at the end of the document. 2.3Executive Summary The present report deals with the analyses of the internal and external business environment, for this purpose the "PESTLE" analysis and

the "Porters five forces model" were used. It also gives a short overview of the company and the type of business it is involved in. The second part of the report is an in depth analysis of how global political changes affect Toyotas policies and decision-making. There is also an evaluation of the effectiveness of the company's response and the demonstration of areas for improvement."

Written by actual Toyota team members, *One Team on All Levels: Stories from Toyota Team Members, Second Edition* is not another technical explanation of the Toyota Production System (TPS). Rather, it illustrates the culture it creates. The stories, told by employees from various levels of the organization, illustrate how Toyota's presence in Kentuck

Examines the reasons behind the success of Toyota as the world's number one automaker, focusing on its history, the abilities of its senior management, and the power of its corporate culture.
